Dear Animal Researcher

The Yunnan Campus Animal Research Facility (ARF) will begin winding down its operations from **June 2016**. This is to prepare for the shift of its operations to the animal facility of the Lee Kong Chian School of Medicine Clinical Sciences Building at Novena that will begin from **October 2016**. The animal facility of the LKCMedicine Clinical Sciences Building will serve as the interim site for animal work while the Yunnan Campus ARF is renovated and expanded. The timeline shown below is of the project phase announced by the President’s office in January 2014.

![Timeline Graphic]

Hence, please consider the following options by **June 2016**:

a) Reduce the number of your animals.
b) Conclude your study.
c) Shift your study to another animal research facility.

The NTU Institutional Animal Care and Use Committee (IACUC) will continue to review new protocols and protocol modifications. However, if the existing Animal Research Facility is unable to accommodate the number of animals or the timeline requested for the study, it may be rejected.

The dates mentioned above are estimated and may be subjected to change. More details will be announced as we approach the date.

We seek your cooperation and understanding during the transition.

Thank you.

Prof Law Sai-kit, Alex  
2014 IACUC Chairman  
Director  
Traditional Chinese Medicine
